

CABLE HARNESSING

OVERVIEW

HARNESSED CABLES

70 years of experience in cable manufacturing as well as temperature measurement and control technique have made a one man business a company with nearly 500 staff members.

We at SAB BRÖCKSKES have enlarged our delivery programme by the field of cable harnessing with our subsidiary KANSA Kabeltechnik. No matter if standard or special product, we offer high quality cables from construction via production to plug connection. No matter if single conductor harnessing, harnessed cables or complete cable sets - we offer a broad programme

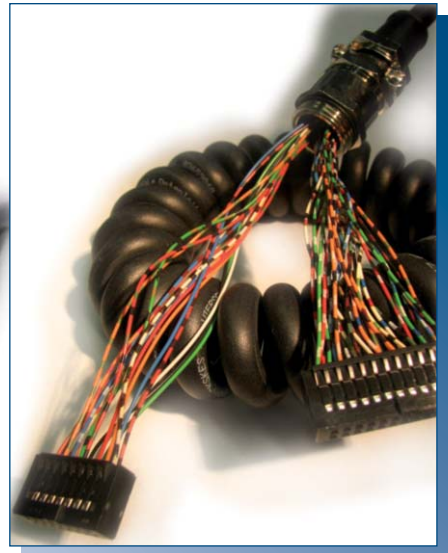

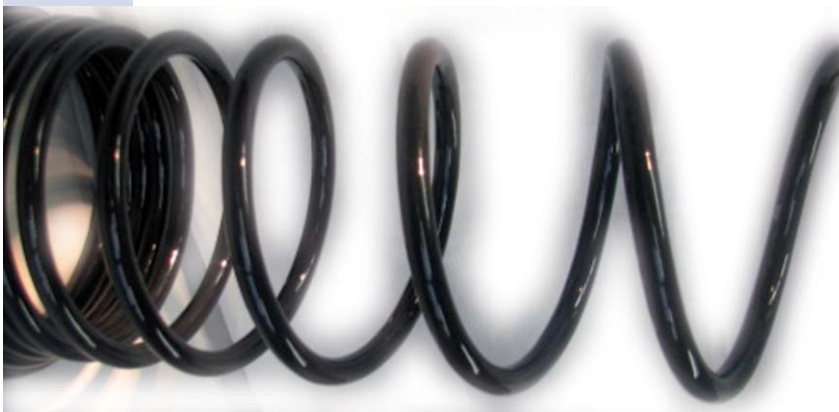

especially according to your requirements and specifications. Harnessed cables are used in many different industrial branches, for example in automobile industry, machine, plant and control system construction as well as in household appliance industries.

The varied combination possibilities of the plug types and stop parts offer rational and economic solutions. Just as the numerous application possibilities of the different materials that are processed at SAB:

PUR (polyurethane), TPE, Besilen® (silicone), PVC (polyvinylchloride), SABIX® (halogen-free), ETFE, FEP, PFA, special materials (glass fiber, Pi-foil, SABtex etc.).

Helix Cables

- spiralized PUR data cables
- spiralized PUR control and connection cables
- cable ends with or without plugs

Cables with moulded plugs

- available on request

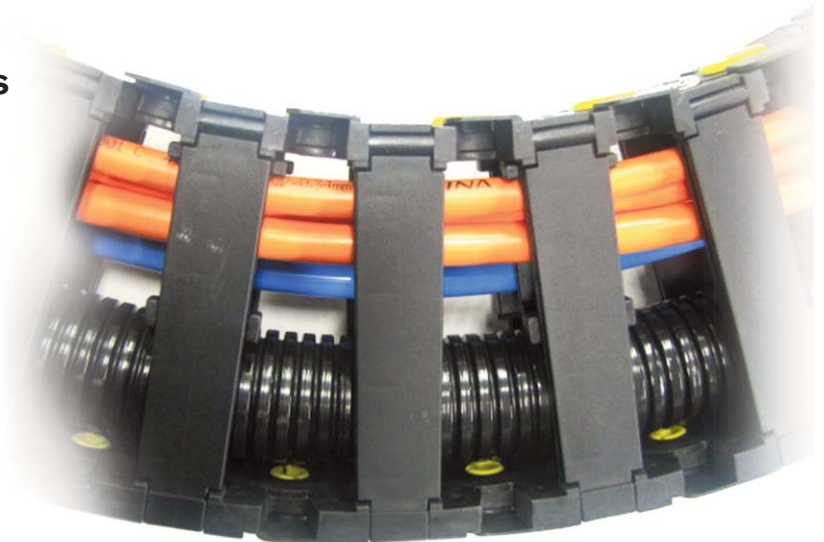

Cables for use in SIEMENS and INDRAMAT drives

- Transmission cables according to Siemens standard
- Servo cables according to Siemens standard with and without brake conductors
- Transmission cables according to Indramat standard
- Servo cables according to Indramat standard with and without brake conductors

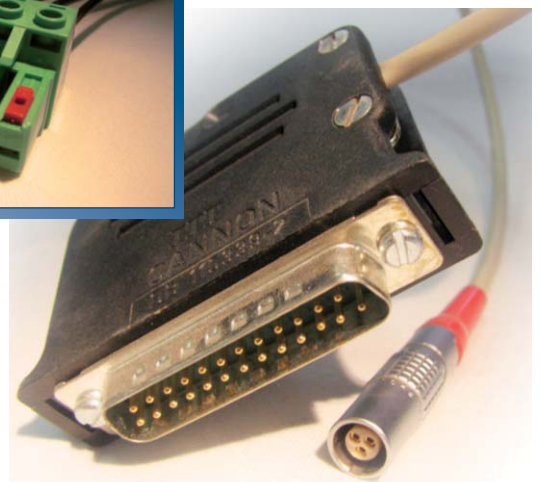

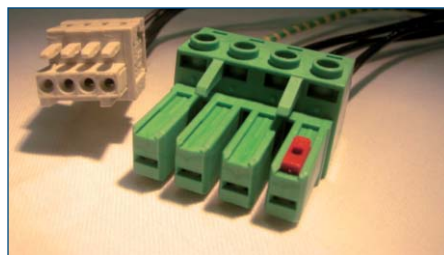

Harnessed cable track cables

- available on request

Harnessed special cables

- according to customers' specification - e.g. with
 - ✓ Harting plugs
 - ✓ Sub-D-plugs
 - ✓ plug-in connectors
 - ✓ RJ 45 connectors
- cables with stripped outer sheath and insulation
- cables with end sleeves

HARNESSED CABLES · OVERVIEW

■ Production of harnessed cables at the SAB subsidiary KANSA Kabeltechnik

■ Harnessed cables for use in different machinery
