

# PT100 / PT1000 8-PLUG CONNECTOR T065 (4-wire circuit)

This item is used, for example in automobile industry for use in test benches. Thermocouples can be easily connected. In case of failure, the faulty element can be exchanged without much effort. Test engines require temperature measurements at the most different points, e.g. in oilpans, cooling tubes and combustion gases, etc.

Here, the cables coming from the different measuring points can be plugged into the connector conveniently. Advantage: Reduced wiring effort. In general the application makes sense, whenever there are many measuring points and far distances that have to be overcome.

The photo shows an 8-plug connector used in automobile industry for example in test vehicles. Thermocouples can be easily connected.

### CABLE VERSION 32 cores:

- PVC / PVC       Besilen / Besilen
- FEP / FEP       TPE / PUR
- other cable version \_\_\_\_\_

CABLE LENGTH: \_\_\_\_\_ m

### CONNECTION ENDS:

- miniature thermoplug 4-pole
- bare ends
- other cable ends \_\_\_\_\_
