REACH Regulation (EC) No. 1907/2006

Information about REACH

European regulation for the registration, assessment, admission and limitation of chemical substances (regulation (EC) no. 1907/2006)

With the help of this regulation for chemicals REACH, it is controlled how and why manufacturers, importing companies, final users and retailers have to examine, assess, declare and register chemical substances. The European Chemicals Agency (ECHA) published a list of especially harmful substances that is subject to a current updating.

The REACH regulation affects mainly manufacturers of raw materials and retailers of chemicals. The company SAB Bröckskes is as manufacturer of cables and temperature measuring sensors except from a registration acc. to REACH.

After intensive discussions with our raw material suppliers, we can assume acc. to our present state of knowledge that there are no chemicals in our products that are listed as harmful substances (Substances of Very High Concern) in a concentration of more than 0,1% acc. to the current EC list (ECHA-list).

Furthermore, we dispose of safety data sheets for all raw materials and additives that are contained in our products and from which dangers could arise. Those safety data sheets are continuously updated and controlled regarding the adherence to the REACH regulation.

If a substance acc. to REACH is identified that gives reason for concern, we will immediately initiate appropriate measures in order to substitute the material in question.

Information to RoHS

**Absence of harmful substances
acc. to RoHS II - directive 2011/65/EU and
commission delegated directive (EU) 2015/863
amending annex II to directive 2011/65/EU
as well as GefStoffV annex IV - no. 24
on request.**
